FROM HYPE TO VALUE

Becoming an AI-Native Enterprise

June 2026

AI has a strong impact on all cognitive dimensions while its scaling is exponential

Generative AI

Language

Language generation

- Virtual agents & search engines
- Documents Generation & Summarization
- Virtual voices & identities

Vision

Image generation

- Images & Video Generation
- 3D environments and digital twin
- Quality enhancement

Reasoning

Synthetic Data

- Synthetic Data
- Data & Signal enhancement
- Code Generation & Migration

Responsible AI

* Not Exhaustive

How to unlock value and become an AI Native company

Lead with **value**

Redesign the

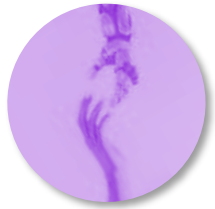
workbench

- Usage of AI-enabled tools to improve productivity
- Leverage and orchestrate AI platform solutions

Reimagine

work

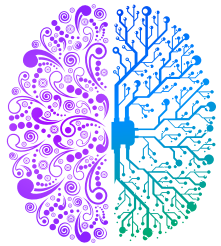
- Cross Business Unit Process Redesign (Mega Process)
- Dramatic Productivity Improvement
- Growth & Innovation
- Improve Efficiency



Reshape the

workforce

- Democratize knowledge
- AI Agent Workforce
- Shift mindsets and behaviors



Rewire the

Enterprise Digital Brain

- Digital Core with foundations to scale AI
- Digital Thread to connect all organizational functions

AI Agents are the fundamental building block for workbench redesign

AI AGENTS are **AUTONOMOUS SOFTWARE** programs that **PERCEIVE** their environment, **UNDERSTAND** intention and **TAKE ACTIONS** to achieve their goals

5 TRANSFORMATIVE CHARACTERISTICS OF AI AGENTS

Agents will initially serve as copilots but gradually tackle more complex tasks

TABLE of AI Agent

Visualizer
Transforming complex numbers into intuitive visuals for informed decisions.

Verifier
Ensuring every number is precise across all financial systems and reports.

Forecaster
Forecast future trends

Recommender
Provide personalized actions and recommendations

AI Compounds

Compliance
Guiding you seamlessly through complex regulatory landscapes

Rev Assurance
management of revenue leakage points

Scenario Planner
Visualizing the future through dynamic what-if analyses and strategic foresight.

Forecaster
Dynamically adjust forecasts to understand input changes.

ILLUSTRATIVE EXAMPLE

Extractor
Extract features, data, content & knowledge

Watchtower
Monitor & Alert, Enable Automated & Curated Insights

Developer
Assisted technology development.

Interpreter
Interprets data and generates insights

Translator
Provide context-aware, multilingual translation

Reconciliation
Automating reconciliations to eliminate discrepancies and save time.

Journal Entry
Agent specialist in analyzing, managing and automating Jes & accruals.

Optimizer
Dynamic planning, simulation

Converser
Intelligent Interactions, Auto-categorize emails and generate email drafts.

Connector
Connecting to existing sources & systems

Librarian
Retrieve, manage & serve knowledge

Generator
Provide multimodal content generation.

Cash Application
Auto-match cash application, resolve exceptions.

Invoice Mgmt.
Agent that focuses on invoice creation, invoice processing

Reshaping the workforce occurs in parallel with the work redesign enabling a Human + Machine organization

What we mean by reshaping the workforce:

Lead in new ways	Leaders are the architects of change when the end points are not always known. They are aligned on the North Star and create conditions for change.
Build a **future-ready** organization	Redesign jobs and reshape traditional organization boundaries as human-machine capabilities proliferate.
Access and create **talent**	Build skills needed to do the new work, including onboarding and training agents.
Deliver continuous **change**	Continuously evolve mindsets and build a culture of continuous learning for greater business agility
Activate for results	Continuously engage people to build commitment and alignment.
